Environmental Statement

8/8/2022

CSS (Connecticut Spring & Stamping) complies with all State and Federal environmental regulations. We manufacture all parts to customers specifications detailed on the customer's blue prints. We do not leave any environmentally unfriendly chemicals on parts we ship to our customers that are not called out on the blueprint.

All engineering design analysis of the component realistically rests with you the customer. We would need to send your blueprints and/or parts to an outside lab for compositional and chemical analysis. Please contact us for a formal quote of the cost, if you would like to pursue this.

Sincerely,

Gia Zarrella-Brown
Director of Compliance
